summary

Passionate Data Scientist with a strong foundation in Machine Learning, Deep Learning, NLP, LLMs, and Python. Experienced in building AI and data-driven solutions, including NLP applications and image classification models. Familiar with RAG, model deployment, and MLOps concepts. Skilled in data processing, statistical analysis, and data visualization. Seeking a Data Science or AI role to contribute to real-world AI and analytics solutions.

Skills

Machine Learning & AI: Python, Machine Learning, Deep Learning, Generative AI, Statistical Modeling, LLMs, RAG (Retrieval-Augmented Generation), Data Structures, Object-Oriented Programming (OOP), Image Processing, Data Processing, Data Visualization

Frameworks, Libraries & Big Data: PyTorch, Scikit-learn, Keras, SciPy, NLTK, Flask, Apache Spark, Big Data Fundamentals, Tableau, Power BI

MLOps, Deployment & Tools: MLOps, Model Deployment, REST APIs, Docker, GitHub, AWS, Jupyter Notebook, Google Colab

PROJECTS

EEG-Based Mental Illness Classification (Graduation Project)

- Built a machine learning-based diagnostic system using EEG signals and symptom data.
- Implemented data preprocessing, feature extraction, model training, and evaluation pipelines.
- Achieved 98% classification accuracy, improving diagnostic reliability and decision-making

ML Workflow for Scones Unlimited (AWS SageMaker)

- Implemented an end-to-end ML workflow on AWS SageMaker.
- Covered data preprocessing, model training, evaluation, and deployment
- Focused on production-ready ML pipelines and cloud deployment

Landmark Classification & Tagging for Social Media

- Built a deep learning pipeline using transfer learning for landmark classification
- Automated image tagging to improve content discoverability on social platforms.

End-to-End AI Resume Screening System

Developed an end-to-end AI-powered resume screening system to classify and match resumes with job descriptions.

- Implemented data preprocessing, model training, and evaluation pipelines.
- Achieved 80% accuracy on the model.
- Deployed the application using Flask and Docker.
- Used command line (CMD) for project setup, execution, and deployment management.

EDUCATION

- Bachelor of Science in Computer Science zagazig university
GPA: 3.7, Grade: 88.792 (Excellent with honors)
- MSc in computer science (Expected 2027)

PROFESSIONAL CERTIFICATIONS

AI Programming with Python Dec.2023

- Completed a professional course covering Python, NumPy, Pandas, Matplotlib, and foundational AI concepts including machine learning and neural networks; completed a capstone project applying these skills to a real-world problem.

AWS Machine Learning Engineer Sept.2024

- Completed training on building and deploying ML models using AWS, including SageMaker, data preprocessing, model evaluation, and hyperparameter tuning. Completed capstone projects applying ML to real-world datasets.

Generative AI and innovation certification) Jun.2025

- Completed a program focused on Generative AI concepts, tools, and applications, exploring innovative solutions and real-world use case

WORK EXPERIENCE

Digital Egypt Builders Initiative (DEBI) – Data Science & Cloud Computing Track

NOV 2025

- Gained hands-on experience in Data Science and Cloud Computing concepts.
- Worked with data analysis, visualization, and machine learning fundamentals.
- Applied cloud technologies and tools in practical projects and case studies.
- Built analytical and problem-solving skills through real-world datasets.
- Collaborated with teams to develop data-driven solutions and technical projects.
- Enhanced knowledge of business intelligence, data processing, and cloud-based systems.

Data & Digital Operations Analyst

Yallazaker (cairo) Sep 2024- Oct 2025

- Analyzed Facebook campaign performance (reach, engagement, conversions).
- Generated data-driven reports and dashboards for marketing insights.
- Interpreted metrics to optimize campaigns and improve engagement.
- Supported content strategy and sales efforts using data insights.
